Luxury Vinyl Floor Care & Maintenance

- Dry sweep or vacuum the floor before wet cleaning to ensure that dirt and grit is removed.
- For Cleaning, we recommend dry mop, broom or damp mopping as needed using neutral PH cleaner.

Recommendation:

- Although the BuildStarr Plank Flooring is waterproof, it is still a best practice to avoid excessive moisture on the floor. Therefore, we recommend soaking up spills immediately using a dry towel or dry mop.
- Limit direct sunlight on floor by using curtains and blinds in areas that are exposed to high UV rays.
- Place walk off mats at doorways and keep your pet's nails well-trimmed.
- Equip swiveled-type office chairs or rolling furniture with broad surface non-staining casters with a diameter of at least 2".
- Although luxury vinyl is quite scratch resistant, always keep your surface free of any debris, small stones or other undesirables that can get dragged across your floor.

Do not:

- Do not use abrasive cleaners, steam cleaners or any type of buffing or polishing machine, oil or petroleum-based products can result in surface staining or dull the finish.
- Never apply wax treatments or topcoats to the floor.
- Never use a steam mop and the heat from the steam mop may dull the finish.
- Do not drag furniture across the floor, felt pads are also strongly recommended under furniture, tables, chairs, to prevent scratches etc.
- Do not install vinyl flooring under permanent or fixed cabinetry. Do not nail or screw anything through a floated floor.
